Dear Faculty, IGERT Fellows, IGERT Associates and Students,

You are cordially invited to attend a Seminar presented by Stephanie Coffman. Please plan to attend.

Alberto Cureg Cruz
IGERT Fellow

Date: Friday, June 6, 2014
Location: Bourns A265
Time: 11:00am

FIJI Is Really ImageJ

Abstract:
FIJI is a distribution of the popular open-source software ImageJ focused on biological-image analysis. FIJI uses modern software engineering practices to combine powerful software libraries with a broad range of scripting languages to enable rapid prototyping of image-processing algorithms. FIJI facilitates the transformation of new algorithms into ImageJ plugins that can be shared with end users through an integrated update system. We propose FIJI as a platform for productive collaboration between computer science and biology research communities.
